

The Deep Pacific Ocean Is Broken/Dead; Devoid Of Life For Thousands Of Miles, Where It Used To Be Filled With Life, Tide Pools From Mexico To BC Sterilized, Devoid Of 99 Percent Of What Used To Be There

The Deep Pacific Ocean Is Broken/Dead; Devoid Of Life For Thousands Of Miles, Where It Used To Be Filled With Life, Tide Pools From Mexico To BC Sterilized, Devoid Of 99 Percent Of What Used To Be There

This article discusses the many ways that the Pacific and other oceans are dying. Mass die off's are common for reasons such as ocean dead zones caused by agricultural industry fertilizer run off, over fishing, chemicals, toxic heavy metal radioactive poisons, and more.

ALMOST EVERYONE KNOWS ABOUT DEAD OCEAN ZONES

The scientists discuss the dead zone in the Gulf of Mexico, which is a place that has no birds, no fish, no living creatures at all, simply due to a lack of oxygen. **Video;** <https://www.youtube.com/watch?v=8jjN36nwXzU> 2 min

As these 'dead zones' grow larger and expand to more places, the oceans of the world are slowly being strangled by chemicals, radiation, heavy metal poisons, toxic chemicals and acidification, just to name a few of many problems.

400 Oxygen Deprived Dead Zones Exist In Oceans Globally

There are many reasons for dead zones in the world's oceans. **There are over 400 dead zones around the planet in the world's oceans. These dead zones are growing overall, due to human activities. These oxygen deprived dead zones are growing larger each year, and spreading to more areas all over the world.**

<http://www.scientificamerican.com/article/oceanic-dead-zones-spread/>

An example of one growing dead zone is on the Pacific coast off of Oregon and Washington; details at link below;

<http://nca2009.globalchange.gov/pacific-coast-dead-zones>

Dead Zones In World's Oceans And Large Lakes Growing, Close To 2 Million Square Miles Globally

<http://agreenroad.blogspot.com/2014/06/2014-dead-zones-in-worlds-oceans-and.html>

A different kind of dead zone in the Pacific may potentially be slowly moving towards the US, as described by a sailboat captain below. This dead zone may be due to a combination of the tsunami washout from Japan, plus the added layer of radiation coming from the Fukushima mega

nuclear disaster that continues up to today. Fukushima is still pouring massive quantities of radioactive water into the Pacific, right up to today. This mega nuclear disaster is just beginning and it is getting worse and worse.

The nuclear industry and mass media stopped covering Fukushima, or they claim it is in cold shutdown, and normal decommissioning. Low dose radiation is 'harmless' according to pro nuclear apologists and biologists repeating it ad nauseum. But is that really true?

CBNC DISCUSSES EARTHS DYING OCEANS IN TERMS OF OVERFISHING; MAN MADE EXTINCTIONS ARE THE CONSEQUENCE IF NOTHING IS DONE

CNBC: The Earth's dying oceans threatened with mass extinction

Around 90 percent of the world's fisheries are either "fully exploited, overexploited or have collapsed," according to the [Monterey Bay Aquarium](#). More than twice as many fishing boats than fishery stocks can sustain are in the water. "There are simply too many boats chasing a dwindling number of fish," said an aquarium spokesperson.

<http://www.cnn.com/2015/11/20/the-earths-dying-oceans-threatened-with-mass-extinction.html?slide=2>

LOW DOSE RADIATION FACTS AND RESEARCH

Everyone would agree that science consists of looking at all potential root causes for any problems, correct? The Pacific is experiencing a mass die off event, plus acidification.

Why would supposed ocean 'experts' refuse to even look at low dose radiation as a potential root cause of ANY problems in the world's oceans, including mass die offs and/or acidification? Is man made toxic heavy metal radioactive poison really that harmless and innocent? How many different and famous people are saying the opposite? How many of these people are scientists, medical doctors and nuclear experts?

What follows is a long list of famous people saying that even low doses of man made toxic heavy metal radioactive poisons are harmful and cause damage. Bottom line, there is NO safe dose of man made toxic heavy metal radioactive poison; none.

Quotes From Famous People About Nuclear Energy And Radiation Dangers

<http://agreenroad.blogspot.com/2013/07/quotes-from-famous-people-about-nuclear.html>

Dr. Sternglass; Low Dose Radiation Hazard; Weakened Immunity

Low Dose Radiation Causes Oxygen Depletion Globally, Kills Oxygen Producing Trees And Algae

<http://agreenroad.blogspot.com/2013/07/low-dose-radiation-causes-oxygen.html>

The fact is that radiation from Fukushima is still POURING out a high level radiation poisonous river into the Pacific ocean, both in the air, the water and the groundwater. It has been pouring out since 3/11, from multiple broken open reactors. The nuclear industry experts are preying on public ignorance when they say no one died and there is no effect on the ocean or the rest of the world, because, they says it is all 'diluted'.

Pouring 600-6,000 pounds of man made toxic heavy metal radioactive poisonous plutonium and multiple times the total radiation that Chernobyl released into the upper atmosphere is not something anyone can magically make go away and disappear.

The Fukushima mega nuclear disaster is NOT GOING AWAY. This poison is not being diluted, but it is being passed up the food chain via bioconcentration and bioaccumulation. This global mega nuclear disaster is NOT OVER. In fact this mega nuclear disaster is just starting.

200 KILOMETERS OF CANADIAN PACIFIC COAST LINE AND SHALLOW TIDE POOLS IS A DEAD ZONE, DEVOID OF 99 PERCENT OF WHAT USED TO BE THERE

FEB 2015 UPDATE: **200 Kilometers Of Canadian Pacific Coast Line Dead Zone Devoid of 99% Of All Life, Almost All Tidal Zone Species Missing Entirely**
<http://agreenroad.blogspot.com/2014/08/200-kilometers-of-canadian-pacific.html>

Something very bad and very deadly is happening in the Pacific oceans. Maybe radiation from Fukushima is just one of many things that are causing the mass die off of just about all life in the Pacific. The supposed experts deny anything really bad is happening and blame 'viruses' on the mass die off of many sea life species such as sea stars, seals, and more.

The experts refuse to test the tissues of dead animals and other top of the food chain sea creatures for radiation or heavy metals such as uranium or plutonium.

CHITIN SOAKS UP RADIATION LIKE A SPONGE SOAKING UP WATER, BUT SCIENTISTS REFUSE TO LOOK AT ANYTHING AROUND MAN MADE ARTIFICIAL RADIOACTIVE HEAVY METAL POISONS POURING OUT OF FUKUSHIMA, PAST A BROKEN ICE WALL

<http://www.agreenroadjournal.com/2016/02/chitin-how-fukushima-radiation-is.html>

Chemical Aftermath: Contamination and Cleanup Following the Tohoku Earthquake and Tsunami

Many toxic, poisonous, hazardous or dangerous chemicals were washed into the ocean, all at once after the tsunami hit. "The resulting list includes acrylamide, asbestos, benzene, bisphenol A, bromomethane (methyl bromide), cadmium, chromium compounds, chloroform, chlorodifluoromethane, ethylene glycol, dioxins, formaldehyde, lead, mercury, toluene, and xylene (see map, p. A292).²² Many of these compounds are respiratory hazards, neurotoxicants, and/or carcinogens. Many are potentially acutely toxic. Some are also environmentally persistent, which raises potential issues of long-term contamination, particularly to local soil and water.....

Yoshioka said the tsunami sludge could also include heavy metals, PCBs, and other pollutants washed down rivers by mines and factories before strict anti-dumping laws were passed in the late 1960s and 1970s.."

SAILOR REPORTS THAT 3/11 TSUNAMI AND FUKUSHIMA MEGA NUCLEAR DISASTER CREATED A HUGE DEAD ZONE IN PACIFIC

Let's start with a sailboat owner reporting that thousands of miles of Pacific Ocean is 'dead'. Assuming this report is true and not made up to get attention, why is the Pacific ocean DEAD and devoid of ALL LIFE? Could it be that the huge amount of radiation that came out of Fukushima was actually A LOT MORE than what was reported, and that it was much more toxic than is being report by the mass media?

Why is it taking a single report from a single sailor to tell us what is really going on, instead of ocean biologists?

So what is really important news that is not being covered? Maybe this would be worthy of much more attention? Here is a direct quoted report from the sailor who went from Osaka Japan to San Francisco, California recently;

He reports; **"The next leg of the long voyage was from Osaka to San Francisco and for most of that trip the desolation was tinged with nauseous horror and a degree of fear.**

"After we left Japan, it felt as if the ocean itself was dead," Macfadyen said.

"We hardly saw any living things. We saw one whale, sort of rolling helplessly on the surface with what looked like a big tumour on its head. It was pretty sickening.

"I've done a lot of miles on the ocean in my life and I'm used to seeing turtles, dolphins, sharks and big flurries of feeding birds. But this time, for 3,000 nautical miles there was nothing alive to be seen."

<http://www.theherald.com.au/story/1848433/the-ocean-is-broken/?cs=12>

He also reported that the paint color on his boat was affected by some unknown chemical or substance in the ocean, which has never happened before. He has sailed all around the world and his boat has never been affected like this before. What is in the water that is causing this? Why is no one studying this?

He also talked about his experience of sailing through the 3,000 mile long Japanese garbage zone that extends from Japan to close to California, where nothing lives and no fish or birds are visible. Normally, any piece of trash or debris floating in the ocean is a life filled island, full of

life both above and below water, with birds above and fish below it, and seaweed hanging from it. This story was also featured in major news outlets, so it is not some wild conspiracy theory, as the pro nuclear apologists like to claim:

The Guardian: [Yachtsman describes horror at 'dead', rubbish strewn Pacific Ocean](#)

USA Today: [Sailor's discovery: 'The ocean is dead'](#)

Telegraph: [Maritime waste: Our oceans are threatened by a toxic tide](#)

Salon: ["It felt as if the ocean itself was dead": One sailor's heartbreaking voyage](#)

Report: Toxins Found in Whales Bode Ill for Humans

A report released Thursday noted high levels of cadmium, aluminum, chromium, lead, silver, mercury and titanium in tissue samples taken by dart gun from nearly 1,000 whales over five years. From polar areas to equatorial waters, the whales ingested pollutants that may have been produced by humans thousands of miles away, the researchers said.

2015 UPDATE - A FISHERMAN WITH 40 YEARS EXPERIENCE SELLS HIS BOAT AND REPORTS ON THINGS HE HAS NEVER SEEN BEFORE

papacares [April 22, 2015](#) friends – just reporting here from a talk with a fisherman, yesterday, of more than 40 years spent out on the ocean from AK to Cabo, they told me they sold their boat and got out because extremely weird things are happening out there – when asked, like what,

they said strange sounds, crazy winds and the ocean has a different almost crystal color. They said, it takes so much fuel to get far enough out to even begin fishing it is not worth it financially and then **they dropped the big one being the ocean temp has gone up 5 degrees at fishing depth, there is nothing out there, no food and fish go where there is food and there just is not anything out there for them to feed on. They also said not many people notice this but all the sea lions in the bay here are juveniles, the breeders have disappeared. With sadness they said the ocean is changing so much it is almost like it is dying.** I then mentioned F1 and they said but if so, why is not this being reported, how can this be?

PhilipUpNorth [April 22, 2015](#) "Paapacares, This fisherman is one of the lucky ones. He got out, and sold his boat. Most fishing boat owners will find no buyers for their boats, which will slowly decay at anchor, in derelict harbors. There will soon be nothing to catch, no matter how far out into the Pacific you go. And even though the main stream press ignores this story, one by one, people are making a decision not to eat Pacific Ocean seafood. This is a very sad development, for the world is losing an industry that adds about \$30,000,000,000 to the global domestic product every year.

Can you spell "depression", boys and girls?"

HOW BIG WAS FUKUSHIMA IN TERMS OF TOTAL PEAK RADIATION RELEASE, COMPARED TO CHERNOBYL OR 2,400 OPEN AIR NUCLEAR BOMB TESTS?

[Credit/source](#) Fukushima Response Campaign

We got an email yesterday from someone quoting Ken B to say that contaminated fish is only problem in Japan, not west coast...that may actually be somewhat true now, but Ken always adds: "it could get worse".

Here's something Oceanus published earlier this year: Fukushima released up to 100,000 times more cesium-137 in surface ocean waters than Chernobyl or nuclear weapons testing
http://www.whoi.edu/cms/files/Radioisotopes_in_the_Ocean_167804.pdf

For more in depth information on this, go to;

2015 Update - Total Fukushima Radiation Released Into Ocean, Air, Groundwater, Storage Tanks

<http://agreenroad.blogspot.com/2012/02/total-fukushima-radiation-released-into.html>

There is a huge coverup around Fukushima, just like there was after Three Mile Island, Santa Susana, Sellafield, Chernobyl and 100 other nuclear disasters you probably never even heard about.

Nuclear Power Plant Threats, Accidents, Recycling Nuclear Fuel, Movie Reviews, Next Generation Nuclear Plants, Terrorists

<http://agreenroad.blogspot.com/p/nuclear-accidents-around-world.html>

But the Fukushima mega disaster is 10-100 times worse, or more, just due to the 600-6000 pounds of plutonium dust and gas that was released, if nothing else. Even if this dead ocean story turns out to be a made up fantasy, that much is still true.

How Dangerous Is 400-6000 Pounds Of Plutonium Nano Particle Dust Liberated By Fukushima?

<http://agreenroad.blogspot.com/2013/08/how-dangerous-is-400-6000-pounds-of.html>

MASS DIE OFFS ARE NOW COMMON IN PACIFIC OCEAN, AFTER 3/11

Kevin Blanch Mar 19, 2015 "Post ignorance , the Pacific Genocide cause of the new Genocide forever walk, I won't just stop there; Painting the soup can. By the way have some amazing videos of the historic best tide pools in California,...They are DEAD,, all the tide pools are dead, and I have seen thousands of them on this walk." **Video;** <https://youtu.be/afapuPx1tu8> 13 min.

Thankfully, this story got a little traction, via the above news outlets, but that is a drop in the bucket, compared to what this story should have gotten.

Deep-sea 'graveyard' filled with the corpses of ocean giants discovered by robotic sub
A chance video recorded by a robotic submarine has revealed an underwater graveyard housing the corpses of some gigantic sea creatures.

<http://news.nationalpost.com/2014/05/13/deep-sea-graveyard-filled-with-the-corpse-of-ocean-giants-discovered-by-robotic-sub/>

One indication of just how bad things got in the Pacific after 3/11, is a study showed that 98 percent of the ocean bottom 150 miles offshore in the Pacific was covered with formerly living sea creatures. The normal amount was 1 percent.

<http://enewnews.com/study-dead-sea-creatures-covered-98-of-seafloor-last-year-150-miles-off-california-coast-had-been-less-than-1-previously>

What if there are many more dead animals on the bottom of the Pacific ocean, not discovered just because we know about as much about the deep ocean bottom and what happens there, as we do the surface of Venus?

The Japanese 3/11 debris field and dead zone is nothing but death and deadness, according to two different studies that looked at the ocean after 3/11 from two different vantage points.

Because no one has researched it, it more than likely has to be because something very toxic and deadly is coming along with the debris.

Certainly chemicals and oil products are in this tsunami debris field that washed out of Japan, but just as surely, man made radiation from Fukushima Daichi (and possibly other nuclear plants) is in the mix as well. Radiation has it's own effect. When will this dead zone arrive via the currents from Japan on American shores? What negative effect will it have? Does this dead zone really exist, because no one else has confirmed it? Time will tell.

HAWAII DIVE FINDS JUST DEAD CORALS AND ALMOST COMPLETE LACK OF ALL SEA LIFE

What is causing the death of corals and the mass die off and extinction of around 130 species per day globally?

It used to be that the coral reefs were the place where one could find masses of colorful fish on many colored reefs. The water was crystal clear due to the filtering work done by countless millions of reef organisms and sea creatures.

Now the water is murky, the many dying or dead corals are covered with algae. Most corals in this video look like they are sick, dead or dying.
Video; <http://youtu.be/b9siRju IOY 11> min.

The sea creatures and fish have almost completely disappeared, with only a few left where there used to be countless millions of them. There is a huge problem in Paradise. Although a location is not specified in this video, it serves as a warning that something REALLY BAD is happening, and more than likely, it is human caused.

What would the Hawaii ancestors and original inhabitants who lived in harmony with Nature on these islands for many tens of thousands of years say about what is happening now?

OFFICIAL Music Video; Israel "IZ" Kamakawiwo'ole - "Hawai'i '78"

Video <http://youtu.be/qyQGn6E3Lcg> 4 min.

Meanwhile, Armageddon keeps on happening... hidden in open sight.

Experts estimates that we are losing 137 plant, animal and insect species every single day due to rainforest deforestation. That equates to 50,000 species a year.

<http://www.rain-tree.com/facts.htm#.U15ObfldWHQ>

PLANET EARTH IS IN THE MIDDLE OF SIXTH MASS EXTINCTION EVENT

Our planet is now in the midst of its sixth mass extinction of plants and animals — the sixth wave of extinctions in the past half-billion years. We're currently experiencing the worst rate of species die-offs since the loss of the dinosaurs 65 million years ago.

http://www.biologicaldiversity.org/programs/biodiversity/elements_of_biodiversity/extinction_crisis/

ELEVATED LEVELS OF RADIATION FOUND IN USA AFTER CHERNOBYL

Many experts claim that radiation is too 'heavy' to travel very far after a nuclear accident. Contrary to this misinformation, after any nuclear accident, the radiation travels all around the world, contaminating huge areas in an invisible, undetectable cloud of poison that then concentrates up the food chain back to humans.

US 1986-1988 IMPORTED FOOD SURVEY DATA ON ELEVATED LEVELS OF CHERNOBYL CESIUM CS-137 PEAK ANALYSIS; via @AGreenRoad

<http://agreenroad.blogspot.com/2013/06/us-1986-1988-imported-food-survey-data.html>

ELEVATED LEVELS OF RADIATION FOUND IN USA AFTER FUKUSHIMA

The many biologists hired by the IAEA, which is a pro nuclear marketing arm of the nuclear industry, all reported that everything is fine with the Pacific, and that there is nothing to worry about. We hope that they enjoy their money, because they are not telling the truth. TEPCO is also saying there is no problem, but no one is calling them on their B#)#(#t.

<https://youtu.be/gc-2ce7qCdo?t=3m>

Radioactive Seaweed Found With 40,000,000 Bq - Seaweed Put Into Many Food Products
<http://agreenroad.blogspot.com/2013/04/radioactive-seaweed-found-with-40000000.html>

The sick and dying sea animals and die offs of numerous species, plus the the lack of animals on the coast of the Pacific sea shores are silent testimony to the deadly avalanche of toxicity that is advancing through the Pacific ocean towards California. It is moving slowly, like a silent, invisible deadly glacier. What happens when it reaches the Pacific coast? Could it wipe out all life when it reaches the west coast of California? Will it even be detectable, or will it be diluted by the time it arrives?

Since 2011, something really bad has been happening in the Pacific ocean. An average of 70% of all sea lion pups are dying, seals with lesions and hair loss, polar bears with lesions and hair loss, plus a reporter getting a high radiation reading from one of them seem to confirm something very bad is happening to the ocean. This die off and strange reports of lesions, sores, hair falling out, in seals, walruses and polar bears is still happening years later, and it all started in 2011, right after the Fukushima mega nuclear disaster.

2015 - Record Level Of Dying, Sick, Injured California Seals And Sea Lions, Mass Die Offs Continue, Started In 2011 After Fukushima
<http://agreenroad.blogspot.com/2014/04/2014-record-level-of-sick-injured.html>

FUKUSHIMA IS NOT IN COLD SHUTDOWN, NOR IS IT BEING DECOMMISSIONED

Fukushima is not in cold shut down. It was destroyed by the 9.0 earthquake, not the tsunami, as the nuclear industry is reporting. The Fukushima mega nuclear disaster is getting worse and going downhill fast. The Fukushima mega nuclear disaster is just starting.

Steam has been coming up from the ground and out/through unit #3 all the way up to today, starting from 3/11 on an irregular but continuous basis, from then until now. Multiple coriums melted down either into the basements and/or into the ground, and are now poisoning the groundwater. There are multiple locations on the Fukushima site with radiation levels above 10 Sieverts per hour, which is enough to kill anyone getting close.

This poisoned groundwater moves into the ocean at a rate of at least 400 tons a day, and it is highly radioactive plus deadly. There is no end to this avalanche POURING highly radioactive

water into the ocean, and no plan to stop it. It has been happening since 3/11, with no let up. TEPCO admitted to this, so there is no dispute about it.

Bottom line, Fukushima radiation continues to pour out of multiple open trenches that have bottoms of gravel, direct from broken open reactors with no end in sight. Fukushima is poisoning the Pacific ocean.

For more details on just this small part of the largest ever mega nuclear disaster, click here...

Fukushima - 200 MILLION Gallons Of Highly Radioactive Water Are Pouring Into Pacific Per Day, Or More; via @AGreenRoad
<http://agreenroad.blogspot.com/2014/03/fukushima-200-million-gallons-of-highly.html>

There is a huge 'death zone' radioactive river pouring out of Fukushima and no one is studying the effect of both the initial accident, this 400 tons a day 'leak', the huge garbage plume and the effects of both the chemicals, oil, and radiation on ocean creature life, much less the effects of Fukushima on human beings and animals such as seals, whales, polar bears and more.

Ignoring Fukushima will not change what happens. This deadly radiation will have a negative effect. Certainly the nuclear industry does not want anyone researching this, so they are putting their money into promoting new plants, through the IAEA and their favorite politicians.

MAN MADE RADIATION CONCENTRATES AND ACCUMULATES AS IT MOVES UP THE FOOD CHAIN LONG TERM

Some things are known about how low dose radiation concentrates up the food chain to humans.

2014 Fukushima Pacific Ocean Radiation And How It Concentrates In Mussels, Sea Stars, Chitons, Clams, Oysters, And Fish; via @AGreenRoad
<http://agreenroad.blogspot.com/2014/01/fukushima-pacific-ocean-radiation-and.html>

As the supposedly diluted and harmless radiation kills or sickens algae, this concentrated radiation moves up the food chain. Some of these contaminated algae move up the food chain and are eaten by fish. These fish are eaten by larger fish. Each step up the food chain concentrates the radiation more and more.

Via CodeShutdown [October 8, 2014](#) "For perspective, 47 Bq/ft³ average contamination of the top 200 feet of ocean is within a reasonable agreement to tests and models which show up to 30 Bq/m³ coming to the U.S. coast and this is bio-concentrated by plankton 10,000 to 100,000 times. Bad news for plankton, plankton eaters and the animals and people who eat them! The radioactive plankton sink to the bottom and marine biologists should be testing all of this!

The average annual concentration of 90Sr in water supplies should not exceed 8 pCi/L (0.3 Bq/L)
Authors: N. Casacuberta

Harvested fish will contain 40 times the radioactivity of the sea water. Infectious, cardiovascular and other diseases are bigger contributors to death than cancer;
<http://www.npsag.org/upload/reports/00-004/00-004%20Castle%20Meeting%202011%2009%20-%20Paper.pdf>

70 TO 90 PERCENT OF ALL HUMAN BODY RADIATION CONTAMINATION GOES INTO BODY AFTER A NUCLEAR ACCIDENT VIA FOOD AND DRINKS, OVER TIME

70 to 90% of all man made radiation comes into and bio accumulates in the human body via food and drinks long term, long after the nuclear accident spill, plume or accident is gone from the news screens.

There are many studies and charts that break down exactly how much of each radioactive element accumulates where and over what period of time, so this subject is not in dispute. Of course, that does not stop the pro nuclear apologists from saying that all of this radiation being ingested is 'good' for you, despite it being a heavy metal poison, and then radioactive on top of that.

WHAT EFFECT DOES FUKUSHIMA RADIATION HAVE ON OXYGEN PRODUCING ALGAE IN OCEANS?

As some percentage of the algae die in massive numbers from radiation effects, they fall to the ocean bottom, potentially causing massive effects on the oxygen content of the bottom layer of ocean, plus a reduction in oxygen production in the top layer of ocean. This issue also deserves study by scientists.

What we breathe is oxygen. 70% of all oxygen produced on the planet comes from algae in the ocean. What if that algae is reduced by 90% or even disappears?

Plutonium And Cesium Bio-Concentrates 26,000 Times In Ocean Algae, Up To 5,570,000 Bq/Kg in Land Algae

<http://agreenroad.blogspot.com/2013/04/plutonium-and-cesium-bio-concentrates.html>

Low Dose Radiation Causes Oxygen Depletion Globally, Kills Oxygen Producing Trees And Algae

<http://agreenroad.blogspot.com/2013/07/low-dose-radiation-causes-oxygen.html>

ALL NUCLEAR POWER PLANTS HAVE A HUGE GLOBAL WARMING EFFECT, BUT IT IS BEING HIDDEN

Low doses of radiation are known to kill both trees and algae, and oxygen levels are dropping dramatically all around the planet.

Radioactive Carbon 14 From Nuclear Power Plants Causing Deforestation, Disease And Death Of Plants and Trees Globally; via @AGreenRoad

<http://agreenroad.blogspot.com/2014/05/carbon-14-emitted-by-nuclear-power.html>

Nuclear Energy As A Direct Cause Of Global Warming; via @AGreenRoad

<http://agreenroad.blogspot.com/2013/12/nuclear-energy-as-direct-cause-of.html>

What if the oxygen producing algae is replaced by bacteria that feed on dead algae falling to the bottom of the ocean, which then creates massive amounts of poisonous and deadly hydrogen sulfide, also know as H₂S? Reports from some experts are that dead zones in the ocean are increasing all around the world due to this reason.

PLUTONIUM WENT ALL THE WAY AROUND THE WORLD AFTER 3/11 FUKUSHIMA MEGA NUCLEAR DISASTER

On top of all of these things and more, humanity all around the world is just waiting for the 8-10 year time clock to run out, which is when the plutonium and all of the other cancer causing Fukushima nuclear time bombs will be triggered.

Santa Susana Sodium Reactor In Los Angeles California Nuclear Plant Meltdown; Completely Covered Up And Worse Than Three Mile Island; via @AGreenRoad
<http://agreenroad.blogspot.com/2012/03/los-angeles-nuclear-plant-meltdown.html>

PLUTONIUM AND OTHER MAN MADE ELEMENTS MOVING UP THE FOOD CHAIN

Meanwhile, Fukushima radiation and particularly extra toxic and deadly plutonium is moving up the food chain and through the food web, contaminating, killing, sickening, causing havoc and chaos. Fishermen can no longer catch fish. They are saying catches have dropped off a cliff for many species. Many more are showing up sick, bleeding, full of tumors, different colors, etc.

US Pacific Coast Seaweed Shows With Fukushima Cesium Contamination - October 19th, 2013 - SimplyInfo; New testing done by Worcester Polytechnic Institute, Dept. of Civil and Environmental Engineering found Fukushima cesium in US Pacific sea weed. The samples were standardized against a known amount of cesium 137 and cobalt 60. The finding of cesium 134 would indicate this is at least partially from the Fukushima nuclear disaster. "Washington State Pacific coast eel weed sample contained 8.14 Bq/Kg of Cs134 and 8.88 Bq/Kg of Cs137. It also contained 3.7 Bq/Kg of Co60" <http://www.fukuleaks.org/web/?p=11613>

IT DOES NOT TAKE A LOT TO CREATE MASS DIE OFFS IN AN OCEAN

Contrary to popular myth, it does not take a lot to kill an ocean and everything in it. Anyone who has ever owned a salt water aquarium knows how sensitive those fish and that water is to even the tiniest change, which can kill all life in a fairly short order, if even a small change is made in the wrong direction. Even a fresh water aquarium is fairly sensitive, with some species of fish

being very prone to sickness and dying or not being able to breed with even one tiny little thing being out of whack.

How Dangerous Is 400-6000 Pounds Of Plutonium Nano Particle Dust Liberated By Fukushima?

WHAT EFFECT IS FUKUSHIMA RADIATION HAVING ON SEA LIFE?

Other than several small dedicated groups, plus a few researchers and citizen activists, plus a few medical/scientists outside of the nuclear industry, no one seems to care about Fukushima and the negative effect it is having on the ocean, sealife, and on the world's population, at least so far. What will it take for humanity to wake up and realize that this nightmare horror show has been unleashed?

ANIMALS AND LOW LEVEL RADIATION EFFECTS

<http://agreenroad.blogspot.com/p/animals-and-low-level-radiation-effects.html>

MULTIPLE PANDORA'S BOXES HAVE BEEN OPENED AT FUKUSHIMA

Multiple Pandora's Boxes were opened at Fukushima on 3/11. The nuclear man made radiation horrors continue to pour out of multiple coriums that left multiple reactors at Fukushima, with no end in sight, and no solutions. But every single nuclear facility is also a Pandora's Box. They all release invisible poisons into the air, water and ground.

The nuclear industry has a goal of spreading plutonium, 1,200 man made radioactive poisons and deadly DU weapons dust all over the planet, with no end in sight. The three to six melted out coriums are still out there, fissioning away, underground, poisoning the ocean, and no one seems to care. TEPCO has no interest in finding them, locating where they are, much less figuring out to stop these radioactive out of control lava blobs from interacting with water underground and contaminating the ocean and all life in it.

See a video and pictures of just a small piece of one out of control radioactive lava blob at this link;

Inside Of Fukushima Reactor 2; Molten Corium Visible, Gamma Radiation Speckles Show Up
<http://agreenroad.blogspot.com/2015/01/inside-of-fukushima-reactor-2-molten.html>

Certainly those in charge of Fukushima do not care about any living thing, not even their own children, or they would have figured out how to stop the tidal wave of radiation pouring out into the Pacific and their own environment that their children have to live in.

The experts have no plans to find these out of control fissioning coriums, nor do they have any plans on stopping the deadly plume of radiation pouring into the Pacific, out of Fukushima. The mass media is ensuring the death of the Pacific, by denying there is any problem, and refusing to send any investigative reporters out to report on the truth of this latest planetary extinction causing genocidal event.

Video; https://youtu.be/8s_yXXDcIwk?t=4m

What effect do they expect from pouring a river of poison into the Pacific, non stop, for one million years? Those coriums are not going out. Water only speeds up their fission process. The corium blobs may actually be growing and getting worse, as neutron 'breeds' new fissioning materials from the surrounding materials. The experts don't think there is any problem with multiple underground 100 ton radioactive lava blobs pouring poison into the air and water on which all life depends. What do you think?

ORWELL OCEAN POETRY

or-well [April 11, 2015](#)

As usual, the hooks at the end.

Never turn your back on the Ocean,
Don't underestimate Gaias' daughter,
She can make very forward advances
And pull you into her water.

No need to forego ocean pleasure,
Meditation, recreational fun,
But give her respect in due measure
And if she withdraws from you – Run!

Your behaviour must be circumspect!

Don't soil her watery gown.
She can, what you build by her, wreck,
And in her rages she can many drown.

Beneath countenance calm or most stormy,
Life rides in the Oceans' great carriage.
We are wed. To her needs be conforming,
Or Gaia will annul the marriage.

SUMMARY

Welcome to planet Earth, the most deadly and radiation contaminated place in the Galactic Universal system.. Galactic tourists and alien 'guest' visitors are advised to seek 'greener', cleaner planets.. Some of these ET visitors looking in as they stop by to visit, give planet Earth and it's human citizens playing around with thousands of poisons, about a 1 in 100 chance of making it... Will humans wake up and realize what they are doing and stop this race to Armageddon and accelerating negative tipping points in time?

45+ Negative Global Tipping Points Report
<http://agreenroad.blogspot.com/2014/04/2014-list-of-45-global-tipping-points.html>

Will we pull out of this nuclear madness and shut down all nuclear plants, plus dismantle all nuclear weapons, or will we keep on committing global nuclear suicide? The answer is in our hands. It is up to each one of us to make a difference. Do what you can..

Positive Or Neutral Global Tipping Points; via @AGreenRoad
<http://agreenroad.blogspot.de/2014/05/2014-positive-or-neutral-global-tipping.html>
